

#ElectronicSignature: Cegedim e-business integrates ARIADNEXT solutions into its signature flow

ARIADNEXT, leading provider in identity verification software and digital identity provider, concluded a partnership with Cegedim e-business, one of the leaders in the digitization of BtoB processes. ARIADNEXT's solutions are designed to strengthen the level of electronic signature for Cegedim's European clients, in compliance with the eIDAS regulation.

An advanced signature for the SY by Cegedim's offer by Cegedim e-business

With its SY GN electronic signature solution, Cegedim e-business makes it possible to sign all types of documents and to digitize all processes associated with a document validation workflow by collecting signatures, archiving evidence in an electronic safe and by sharing documents via a DMS module. By integrating ARIADNEXT's verification solutions, SY GN offers a HIGH level of authentication, which relies on the online verification of an identity document.

"The availability of the online ID verification service in more than 190 countries allows us to support our global customers worldwide.

Thanks to ARIADNEXT, our digitization and electronic signature services benefit from a strong authentication method worldwide. "Jean-Marie Simon, Director of SY GN.

An opening towards new regions and new customers

ARIADNEXT, the Rennes-based company already active/established in multiple European countries (Germany, Poland, Romania, Spain...), is excited about this new partnership, which will open doors to a new industry in Europe and will attract new customers.

"ARIADNEXT is consolidating its position as a European leader in the field of identity verification by building strategic partnerships with electronic signature players. With Cegedim, we are entering the healthcare sector in Europe," adds Guillaume Despagne, CEO of ARIADNEXT.

About Cegedim e-business

Cegedim e-business is one of the leaders in the digitization of BtoB processes in Europe, with more than 900 million flows processed per year and 2,000,000 companies connected worldwide. With its SY by Cegedim offer, a collaborative solution, Cegedim e-business supports companies of all sizes and in all sectors of activity in their digital transformation projects.

A member of the European PEPPOL and EESPA networks, Cegedim e-business operates a unique multi-channel electronic exchange platform that handles all types of documents, from contract to payment, simplifying and streamlining relations between all the company's players and with its partners, as well as making significant gains in terms of administrative efficiency, cash flow, and traceability.
